

Item No. 213032 - Monitor Mount for Vertical Slot Attachment

ProClip®
Installation Instructions

Compatible with:

ProClip All Monitors with a vertical slot in back

Warnings:

Carefully read all instructions and review the images before attaching.

Do not attach anything to the mount until after attaching the mount to the dashboard. Doing so makes it more difficult to attach the mount to the dash. **Please note:** If you screw into the mount it will be considered used and therefore non-refundable.

The ProClip mount and/or holder in the installation pictures may look slightly different from the one you have received. However, the same instructions apply. If you have questions call our customer service at **1-800-296-3212** or **+1-847-388-7171**.

ProClip USA, Inc. may not be held liable for any personal injury or damage to a vehicle or device, resulting from accident or improper use or installation, before, during or after the installation or removal of this mount and/or holder.

1. Unscrew the screw on the lower part of the faceplate and remove it.

2. Place the base plate of the Tilt Swivel onto the ProClip dash mount (or any other mount or flat surface). Attach the base plate by using the applicable screws enclosed self-tapping screws if the mount has small holes or machine screws with nuts if the mount is made of metal and has large holes.

3. Place the faceplate over the base plate and screw the pieces together. Adjust the faceplate to desired position and tighten the screw further. Note that the face plate will be harder/looser to tilt and swivel depending on how tight you screw on the screw.

4. The Monitor Mount is now in place. Place the screen onto the screen mount by sliding it downwards from above onto the nut in the center of the face plate. The rubber ring on the metal piece is to be **OUTSIDE** the groove on the back of the screen. Tighten the wheel on the back of the screen mount so the screen has a firm fit. The screen can be removed and you can take it with you when leaving the car.
