

Compatible with:

The adhesive tape referred to below does not leave any marks or damage on the area it is attached, and it is easy to remove.

Warnings:

Carefully read all instructions and review the images before attaching.

Do not attach anything to the mount until after attaching the mount to the dashboard. Doing so makes it more difficult to attach the mount to the dash. **Please note:** If you screw into the mount it will be considered used and therefore non-refundable.

The ProClip mount and/or holder in the installation pictures may look slightly different from the one you have received. However, the same instructions apply. If you have questions call our customer service at **1-800-296-3212** or **+1-847-388-7171**.

ProClip USA, Inc. may not be held liable for any personal injury or damage to a vehicle or device, resulting from accident or improper use or installation, before, during or after the installation or removal of this mount and/or holder.

1. Slide the little male plate off the large female plate. Clean the surface where the plate will be attached with the enclosed alcohol pad. Peel off the cover on the adhesive tape on the large plate and attach the plate to the back of your device. Press firmly down on the plate for best possible attachment.

2. Place the little male plate over the matching holes in the dashboard mount and attach it with enclosed self tapping screws.

3. Slide the device down onto the male plate.

4. The Move Clip is now in place.
NOTE: The adhesive tape may loosen if it is exposed to extreme heat over several hours e.g. being left in the car on a parking lot in 90 degrees Fahrenheit/ 30 degrees Celsius a whole work day.
