

Compatible with:

Warnings:

Carefully read all instructions and review the images before attaching.

Do not attach anything to the mount until after attaching the mount to the dashboard. Doing so makes it more difficult to attach the mount to the dash. **Please note:** If you screw into the mount it will be considered used and therefore non-refundable.

The ProClip mount and/or holder in the installation pictures may look slightly different from the one you have received. However, the same instructions apply. If you have questions call our customer service at **1-800-296-3212** or **+1-847-388-7171**.

ProClip USA, Inc. may not be held liable for any personal injury or damage to a vehicle or device, resulting from accident or improper use or installation, before, during or after the installation or removal of this mount and/or holder.

1. Unscrew the screw in the center of the Vesa Mount and remove the Face Plate from the Tilt Swivel base plate. Place the Tilt Swivel base plate over either the 2 hole vertical hole pattern in the vehicle mount or the 4 hole AMPS hole pattern. Then attached the plate with the enclosed self-tapping screws.

2. Continue to attach the plate.

3. Place the Vesa Mount face plate onto the Tilt Swivel base plate and attach it with the previously removed screw. This screw also controls the pivot, tighter for a firm hold and lose for more (easier) movement/angling of the Mount.

4. The Vesa Mount is now in place.
